

Enhance security with Windows and Office

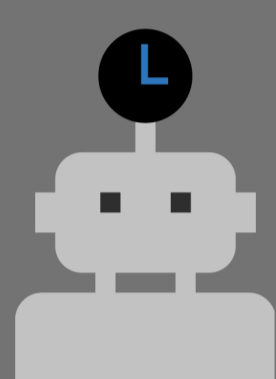

Ensure users are protected with security capabilities that respond to the latest threats using Windows 10 and Office 365.

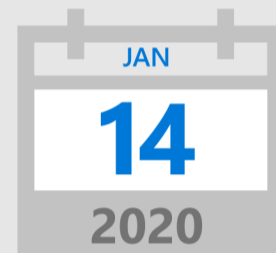

28% of employees use at least one unsanctioned tool to supplement the business tools provided by their company.¹

58% of data breaches took place at small businesses.²

250% increase in phishing email detections.³ Taking hackers **4 minutes** to get into networks through email attacks and **286 days** for detection, followed by an additional **80 days** for damage control.⁴

End of support is here!

As of January 14, 2020, security updates and support for PCs running Windows 7 will no longer be provided.

Extended support for Office 2010 will end on October 13, 2020.

How will end of support impact me?

A skyrocketing number of devices and apps put your company's sensitive data at risk.

Protect against external threats and leaks with security and compliance tools built into your devices.

Leverage built-in automated threat intelligence

Threat-protection technologies in Windows 10 help protect against spam, malware, viruses, phishing attempts, malicious links, and other threats.

Get built-in malware protection to help keep your Windows 10 devices safe from viruses, spyware, and other malicious software.

Ensure secure remote access across all devices

Windows 10 and Office 365 continually update across all apps, so you don't have to worry about upgrades, keeping you compliant and secure.

Stay current with the latest updates and support for Office and Windows.

Controlled access to sensitive business information

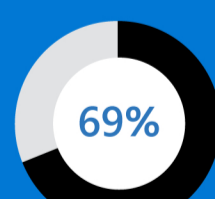

Proactively safeguard your organization with enterprise-level security on all apps and devices.

Control who and when someone has access to your business information with security groups and customizable permissions across Office 365 services.

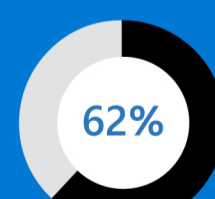

Proof points

\$120K is the average cost of an SMB data breach.⁵

Avoid security risks caused by unsupported solutions, in which **69%** are not aware of the end of support date.⁶

62% lack the skills in-house to deal with security issues.⁷
